

# Peyman Group Amol

Over 35 years enterprise in production, distribution, import and export, Peyman group decided to register and produce foodstuff and hygienic goods in Lubon brand derived from the name of local place in the skirt of Damavand and Laseh county in Lahijan zone. In French it means benediction and welfare.

Now the products with Lubon brand contains tissues, fish tuna, tomato paste, halva shekari, mineral water, safety match, condiments and corn oil. The board of directors of Peyman group have decided to increase number of products in Lubon brand and expand their distribution zone all over the country. To achieve this policy Peyman group could grasp the sole agency of Alghurair Co., to import corn oil from U.A.E.

Due to the high quantity and speedy production line capacity Peyman group has installed production line of corrugated paper from Agneti company from Italy and produce micro flute corrugated paper in F-flute, E-flute sizes and the other current fluting papers including C and B. So it has converted Peyman to be one of the powerful focused economy in the region which play a super eminent role in growth of production and occupation.

Now the company is installing the second production line of corrugated paper with width of 2400 mm making the region independent and stop the importing of sheets so the packing will improve.

Peyman group installed Iranian machineries at first and started to produce carton then equipped this line with foreign machineries with high quality and speed. For example flasco in 4 colors with automatic dycut (rotary) and a complete automatic machineries with capability of printing of 4 colored picture on carton whereupon could make a significant progress in giving favorite services to customers in price and quality point.

Peyman management team bought one of the most modern printing and packing line from taiwanian factory called MingWei, after considering and surveying of many factories all over the world for example Korean, Chinese taiwanian and, ... which can overproduce high quality pictures 375 dpi and can feed factories nationwide such as Kaleh (dairy and

meat product) Kondar(ABC powdery) Amol Paksh (biscuit and cookie), Aras Bazar(Animal Foods), Shodouh, Tissue, Daland, Keivan, Amol meat products, TizPak, etc.

The carton production complex succeeded to receive the global standard certificate in quality management (ISO) from RWTUV German Co., and perform all levels of manufacturing of carton and paper demands of customers all over the country in large quantity.

The advantage of this group is its close relationship with other manufacturers, and offering of broad transportation system by preparing and dispatching their required cartons and distribute their products according to the required destinations. The following Diagram describe the activity of this mechanism.

Amol Peyman Group started exporting and importing goods to Middle east and Europe actively from 1993 and established energetic agents and branches in Kazakhstan (Almata) and Uzbekistan (Tashkand), Dubai and Tehran and employ a skillful management team and strong relations with abroad and businessmen all over the mentioned countries and could grasp The Best exporter Award of Mazandaran province in 2001, 2002, 2003 and 2004 and be member of board of director of Sari Chamber of Commerce joining Iran-Thailand in 2006.

Foreign Trade Complex of Peyman assisted by solid and proficient management not only imports and exports foodstuff, hygienic good and other permitted goods but also performs all commercial stages of importing of commodities in particular brand (i.e. LUBON), production line machineries and raw materials such as (paper, tissue and, ...).

Foreign commercial distribution of Peyman group has linked to one of the biggest international companies expanding its activity in field of importing of modern industrial machineries in terms of distribution, Peyman is feeding 4 large northern provinces includes Gilan, Mazandaran, Golestan, Semnan and some parts of Tehran by its 70 experienced distributors among more than 6500 fixed customers. The powerful distributors team are equipped with GPS controlled by sales department on line which is the first specific system to

manage the human forces all over the country by applying graphic map for all 5 provinces mentioned above, meanwhile Peyman utilizes computerized modern storehouse charge and discharge of goods is performed from 20 gates by using rolling system based computerized code, so delivery process to all clients is made very fast.

Since Peyman Group of Amol is agent of some famous and valid manufacturers of country including: Kesht o Sanat e Shomal, Paknam, Mahidasht, Tak Macaron, Shokouh, Varda, Zam Zam, Lina, Panasonic, One and One, Zoshk, Keivan, Roshd and..., so it can offer a complete collections of goods to all customers in a competitive price and condition as compared to other distribution companies, so our net dispensation could after 4 decade experience rise it's efficiency by utilizing the latest software and independent sales promotion. The distribution system is divided to two independent group to keep this efficiency and focus on different kinds of goods.

The great Peyman complex was established in 1968 by the partnership of Mr.Seyed Eskandar Vahdat and Mr. Changiz Rismanchian in Amol city. The first sub company of this complex started its work simultaneously in the field of distribution of food stuffs and hygienic goods. The outcome of this partnership and cooperation after elapsing four decades indefatigable efforts is establishment of 7 autonomous active companies including Peyman Insitution Omid Peyman Co., Peyman Mehr Shabestan Co., Peyman Karton Kar Amol Co. Elaheh Peyman Industrial-commercial Co., Sasan Peyman Co., and Aran Caspian Co. which work in manufacturing, importing and exporting, and distribution.

The companies have had continuous growth with regard to its strong management team and more than 450 full trained and expert employees in its different field activities. Now it has more than 100,000 square meter of warehouse, industrial pre-fabricated metal structure, sport space and head office in 4,000 square meter which make it as one of the biggest private complex in nationwide which having an effective role in developing the economy of northern provinces especially Mazandaran, Gilan and Golestan.

ISLAMIC REPUBLIC OF IRAN

Ministry of Energy

Esfahan Province Water and Wastewater Co.

Invitation for Prequalification

## Foreign Financing, Inspection and Rehabilitation of Mains and Sub Mains of Esfahan Wastewater Collection System Project

Esfahan Water and Wastewater Co. intends to award the Contract for the project described below to an eligible applicant.

1. **Bidding Agency:** Esfahan Province Water and Wastewater Co.

PO Box 90, Esfahan-Iran

Tel: (+98-311) 6680030-8 Fax: (+98-311) 6689586

2. **Engineer:** Mahab Ghodss Consulting Engineering Company

No. 17, Takharestan St., Dastgerdy Ave., Tehran-Iran

Tel.: (+98-21) 22221071-8 Fax: (+98-21) 22276487

3. **Brief Description of Work:** Financing (foreign source of funds), inspection of 358 km of network using CCTV inspection method, flow metering in 40 locations and rehabilitation of 25 km and construction of 6 km of relief sewers (trenchless method) of Esfahan Wastewater Collection System.

4. **Place of Work:** Esfahan Province - Iran

5. **Cost Estimate:** Fifty (50) million Euro

6. **Work Implementation Period:** Thirty six (36) solar months

7. **Qualifications of Applicants:**

7.1 The local contractors holding grade 1 in Water discipline according to the grade classification of Management and Planning Organization of Iran adequately experienced in inspection, rehabilitation and construction of wastewater collection systems shall form joint venture in compliance with applicable regulations and laws.

7.2 Each firm can be a partner in only one joint venture.

7.3 The local contractors can form joint venture in compliance with foreign contractors experienced in inspection, rehabilitation and construction of wastewater collection systems with applicable regulations and laws of Islamic Republic of Iran.

8. **Issuance of Prequalification Documents:**

Eligible applicants may receive the Prequalification Documents from Mahab Ghodss Consulting engineering Co. on June 21st, 2008 during office hours. The Prequalification Documents shall only be delivered to the bidder's representative against a reliable introduction letter stating the subject of Prequalification sealed and signed by the authorized signatory. The Applicants may also obtain the Prequalification Documents from the following web sites:

http://iets.mporg.ir and http://www.abfa-esfahan.com

9. **Submission of Prequalification Documents:**

The completed Prequalification Documents after examination by applicants must be submitted in sealed envelopes to Mahab Ghodss Consulting Eng. by the end of the office working hour on July 15th, 2008. A receipt will be given against submission of the Documents.

10. **For more information or any inquiries, applicants can email pmu@nww.co.ir.**

## Iran, Syria to set up joint bank, insurance institute

Tehran Times Economic Desk

SEMAMAN — Chairman of the Iran-Syria Joint Chamber of Commerce announced here on Sunday that the two countries have come to terms for setting up joint bank and insurance institutions, IRNA reported.

Mr. Hassan Javad added that the joint bank will be furnished with 30 million dollars, of which the two countries will provide 10 million dollars each, and the rest 10 million dollars will be secured through issuing subscription bonds.

The joint insurance institution's capital will be five million dollars, of which the two countries will provide 1.5 million dollars each, and the rest 2 million dollars will be secured through issuing subscription bonds, he noted.

He pointed out that the Iran-Syria Joint Chamber of Commerce planned to augment the value of trade to 800 million dollars from the current 200 million dollars.

The Syrian official called for more cooperation of the private sector for expansion of the bilateral economic relations.

Currently, Iran has several industrial projects underway in Syria including cement factories, car assembly lines, power plants, and silo building.

## “Made in Asia” label helps, hinders luxury goods makers

By Sophie Hardach

TOKYO (Reuters) — With their rich cultural heritage and a history of producing silks and embroidered textiles, China, India and other Asian countries should in theory be well placed as manufacturers of luxurious clothes and accessories.

Japan, for one, already outshines Europe as a specialist for certain accessories and fabrics, especially expensive denim. Many consumers, however, would prefer not to discover a “made in China” tag on a \$1,000 dress.

Asian shoppers are particularly origin-conscious as French and Italian luxury goods are important status symbols in the newly affluent region. And the opinions of Asian shoppers are beginning to matter more and more as growth in more mature markets slows down.

“In Asia, in a certain segment, you can't offer a product made in China or made in Asia,” said Patrizio di Marco, president and chief executive of Bottega Veneta, on the sidelines of a luxury

goods conference in Tokyo.

“They are very aware of where the product was made, and whether it was made in Italy, made in France.”

Industry experts say this concern with origin varies greatly between countries. U.S. shoppers, for example, are more tolerant about where their clothes are made.

When it comes to more accessible designer brands, consumers may be less prejudiced than some producers think.

Customers are also increasingly aware that the manufacturing process behind a garment is much more complex than the little white tag suggests.

Luxury goods makers say they regularly inspect suppliers and sever ties when a supplier is found to violate labor laws. However, it is not always easy to keep tabs on outsourcers.

Some fashion companies say the solution is to drastically shorten the supply chain and use manufacturing in developing countries as a selling point for “ethical consumers” in the West.
