

Iran hub of new infertility treatments in Middle East - Tehran Times

Health Desk

21 May 2013 14:00 - **TEHRAN** – Iran ranks first in the Middle East in treating infertility, the director of the Iranian Scientific Society of Fertility and Infertility has said.

Dr. Mohammad Parsanejad said Iran uses the newest technology in treating infertility. He added there are 60 centers in the country for the purpose.

Parsanejad also said that the 19th congress of scientific society of fertility and infertility will be convened at Millad Hospital in Tehran from May 22 to May 24.

The congress will be held at national level.
